LAND WARRANTS sep 11-3taw2w BOUGHT at the highest market rates at the Bank of th Union. [News] jy 18—tf Transition Coal.

Transition Coal.

This rare and valuable Coal is a variety not quite changed into an anthracite, and it has only been discovered (in large quantities) at three places upon our globe, viz: at South Wales, Great Britain; at Bonets, in Russia, near the Black Sea; and at Dauphin and Lebanon counties, Pennsylvania. In the London market this coal commands the kighest price. It is now mined upon the large estate (2,000 acress) of the Dauphin and Susquebanns Coal Company, situated in Pennsylvania, and it is nearer to the cities of Baltimore and Washington than the coal of any other region. For easy ignitica, durability of fire, complete combustion, oasy adaptation to the temperature of the weather, and its great power in generating heat, it is the asstroad in the world. It has the inflammability of the bituminous coal, with the cleanliness of the anthracite, find a greater durability than either. It burns without making any soot or visible smoke, and the combustion is so complete that it retains the fire until all the coal is commend. Not so with the anthracites, especially the hard and heavy kinds. They do not burn up, and hence the common troublesome practice of sitting their ashes to obtain more fuel. In burning the Transition Coal there is no woate, for the small coals made by handling, burn as well as ordinary coal. All should be burned together. If screened at all the dust only should be taken out.

taken out.

A very erroneous impression exists with many persons that the heaviest coals are the most economical for ordinary purposes. This might be the case if coals were sold by measurement, but never when they are sold by weither. In Taylor's valuable work, (Statistics of Coal) the details are given to show that 31 pounds of a free-burning red ssh yielded more heat to a room in 15 hours, than 37 pounds of a heavy white ash coal, making the red ash, at \$5 50, to be more economical than the white ash at \$4 61 per ton. Any person accustomed to use these heavy coals will be astonished at the saving which can be made in burning the lighter kinds, when tested by the weight and burnt in a suitable manner.

manner.

An apprehension exists with some that the free-burning coals have a tendency to clinker. Now, as a general rule, no coal will clinker unless a greater draught be applied to it than the coal naturally requires. No one would think of applying a bellows constantly to a fire made of seasoned hiekory or oak wood, and it would be equally as absurd to apply a blast constantly to a free-burning coal. But the heavy white sah anthracites cannot be burnt without a powerful draft, and without using a larger quantity of coal than the temperature of the weather sometimes requires. Various patterns of stoves, furnaces, cooking ranges, &c., are invented annually to conquer this difficulty, but it has never been done with complete success. In every contrivance, however, which has been invented to burn coal, the transition variety will make a beautiful fire, and no complaint will ever be made to a manufacturer or seller of grates or stoves when this coal is used. The draft alone is to be regulated by a damper. In introducing this new coal for the first time, prepared as it now is by steam power machinery for domestic use, it may give greater confidence to the buyer to say that the celebrated free-burning red ash veins in the Peach Orchard district, near Pottsville, are a continuation of the Dauphin seins, and they approach the nearest in value to the Transition coal.

Shipments of the Transition coal have already been made to the District of Columbia, and it can be obtained at retail from the following persons:

Wm. T. Dove, Washington. Woodford Stone, Washington. F. Magruder, do Hunsberger & Co., do Wm. THE LOST SENSES: DEAFNESS AND BLINDNESS. By Dr. Kitto.

"This is a work of great interest, from one of the most learned and accomplished writers of the age, revealing the mysteries of the world in which those live who have been deprived of the sense of sight or hearing. Ever since his boyhood, for more than thirty years, Dr. Kitto has passed a life of great activity as a scholar, in a state of the most intense deafness to which any living creature can be subjected. His account of himself, and of his discriminating remarks on the condition of the blind, James Mitchell, Laura Bridgeman, and others,) are replete with profound thought on the interesting phenomenon presented in the progress of their mental training."—Christian Observer.

MARRIED

In this city, on Thursday, September 16, by the Rev. HERSE STANLY, of New York, E. B. CAMP, esq., of Indiana county, Pennsylvania, to FANNY E., daughter of A. B. WALLEE, esq., of Washington.

DIED.

This morning, Dr. THOMAS P. BALDWIN, aged about S years, a clerk in the Census Bureau. His funeral will be attended to-morrow at 2 p. m. from the house of Mr. S. Rust, on 9th street, between L and M.

(Morning papers please copy.)
In Georgetown, on the 20th instant, Mr. WILLIAM R. At a meeting of the members of the Georgetown Classical and Mathematical Academy, it being announced

that Mr. Abbor, the former principal of this school, had deceased, a committee was appointed to draw up suitable reso-lutions, and to make such arrangements as the sad occasion night suggest to show a proper respect for the memory of our much-beloved and revered teacher. On their report, it Resolved, Since it hath pleased Almighty God, in his wise providence, to take out of the world the soul of our late re-

spected and beloved teacher, Mr. WM. R. Albor, that this school will attend the fureral in a body; and, as a testimony of the profound respect this school entertains for the mem ory of the deceased, that we wear the usual badge of mournng for thirty days. Resolved. That we shall ever entertain the recollection of Mr. ABBOT's rare qualifications as a teacher, and the deep interest he ever manifested for our welfare; that we feel a

leep sympathy for the surviving members of the family of the deceased, who are called to mourn, but not without hope that the departed has left a world of sin and sorrow for one where there is no more sickness, nor pain, nor death, and where God shall wipe away tears from all eyes.

Young Lady's Counsellor.

THE YOUNG LADY'S COUNSELLOR; or, Outlines and Illustrations of the Sphere, the Duties, and the Damers of Young Women. Designed to be a guide to true happiness in this life, and to Glory in the life which is to come. By Rev. Daniel Wise, A. M.

This work has been received with very great favor whereever it is known. The editor of the Northern Christian Advocate says: "We had heard good things of this work, and on reading it, most cheerfully add our testimony to its merits. It is not adventurous in its flight—alms at no terre incognito; but most gently and assiduously cultivates ground already known. Its sage counsels, enlivened with illustrations, are worth of a place in every lady's mind. The style is not ornate—it is better—flowing like the limpld, transparent brook over its pebbly be diffusing health and pleasure wherever it goes. The work is not wanting in merve and originality; it is sufficiently removed from fracteness of jejune and forceless compilations scissored from preceding authors, and glued together by the mere book-maker. For the objects had in view, it is one of the best works we have ever objects had in view, it is one of the best works we have ever

The New York Express advances the opinion that the effect of the clause introduced in the civil and diplomatic bill prohibiting the gold issue of the United States assay office to be received in payment of public dues, will create a great sensation in San Francisco, and that it may cause the shipment of considerable amounts of coin to that quarter to supply the deficiency in the currency. The importers in San Francisco will at first find a difficulty in paying the duties, and many goods wanted for immediate consumption will be locked up in the bonded warehouses for the want of a sufficient legal currency. The establishment of . an assay office in San Francisco, and legalizing the ingots by their receipts in payment of public dues, had the immediate effect of raising the price of gold-dust one dollar per ounce.
